

A scenic landscape featuring large, leafy trees in the foreground and a field of white flowers in the middle ground. In the distance, a small town or village is visible under a clear sky. The overall atmosphere is peaceful and natural.

Cowfold Neighbourhood Plan

**Thank You
Jerry Hooper**

Vision

- **Maintain the village atmosphere and sense of Community that make Cowfold a desirable place to live.**
- **Keep housing integrated within the village and balanced to meet current and future needs, ensuring that any development is sustainable, is in balance with the available infrastructure and the needs of the existing Community.**
- **Enhance the benefits of our rural location with its services, facilities, amenities and activities.**
- **Create an environment that reduces the impact of traffic focusing on the health of residents and safety of pedestrians and cyclists.**

Summary

- **Thank you Presenters and to you our Community**
- **We have seen some interesting proposals which in could provide a significant number of homes**
- **HDPF lists Cowfold as a Medium Village so one with limited development potential, although even 5 – 10 homes pa would take us to 65-130 homes by 2031.**
- **Most of us live in homes built in the last 30-40 years so without some development Cowfold as we know it would not exist!**
- **We need to find the right balance between allowing our Community to thrive while maintaining the Rural Village Atmosphere that we all love**
