**Summary of the Project:**

The Applicant is seeking development consent for an offshore generating station adjacent to and forming an extension to the existing Rampion Offshore Wind Farm, at the location approximately 13km south of the Sussex coast located to the west and south of the existing Rampion Offshore Windfarm, and all infrastructure required to transmit the power generated to the Bolney National Grid substation, which will require to be extended (the "Proposed Development"). The offshore generating station is located in an area approximately 196km<sup>2</sup>. The onshore cable corridor is approximately 38.8km long from the landfall at Climping, West Sussex to a new substation at Oakendene, 2km east of Cowfold, West Sussex and then to the existing Bolney National Grid Substation, at Twineham, Mid Sussex. The onshore elements of the Proposed Development fall within the administrative boundaries of the following host authorities:

- Arun District Council;
- Horsham District Council;
- Mid Sussex District Council;
- South Downs National Park Authority; and
- West Sussex County Council.

In summary the Proposed Development includes:

- an offshore generating station with an electrical export capacity of in excess of 100MW comprising up to 90 wind turbines and array cables, in an area approximately 196km<sup>2</sup>, located approximately 13km south of the Sussex coast located to the west and south of the existing Rampion Offshore Windfarm
- up to three offshore substations
- cables between the wind turbine generators ("WTG"), between the WTGs and the offshore substations, and between the offshore substations themselves and the landfall location at Climping, West Sussex
- an underground cable connection between the landfall, and a satellite substation known as Oakendene, and then onwards to connect into the existing National Grid substation at Bolney, together with an extension to that existing substation.

The Proposed Development comprises a Nationally Significant Infrastructure Project (“NSIP”) pursuant to sections 14(1)(a) and 15(3) of the 2008 Act as an offshore generating station having a capacity of more than 100MW. Pursuant to section 31 of the 2008 Act a DCO is required to authorise an NSIP.

The Proposed Development also includes associated development linked to the NSIP which can be authorised by a DCO pursuant to section 115 of the 2008 Act.

The Development Consent Order would authorise the compulsory acquisition of land, interests in land and rights over land, and the powers to use land permanently and temporarily.

A map showing the location of the proposed location of the project forms part of the Application and can be viewed at the following link: [infrastructure.planninginspectorate.gov.uk/rampion-2](http://infrastructure.planninginspectorate.gov.uk/rampion-2).
